PROFESSIONAL SUMMARY

Results-driven Data Scientist with 2+ years of hands-on experience building and deploying machine learning models, conducting advanced statistical analysis, and translating complex data into actionable business insights. Proficient in Python, SQL, and cloud-based data platforms (AWS, BigQuery). Experienced in end-to-end ML workflows — from data ingestion and feature engineering through to model deployment. Dual MSc holder in Data Science and Big Data Computing. Particularly strong in customer churn prediction, NLP, and time-series forecasting.

WORK EXPERIENCE

Data Scientist Consultant | 10Alytics *Apr 2024 – Present*

- Developed and fine-tuned supervised ML models (logistic regression, decision trees, random forest) to predict customer churn, improving model accuracy by 18% through systematic feature engineering and hyperparameter optimisation.
- Performed end-to-end EDA using Python (Pandas, Seaborn, Matplotlib) to identify behavioural patterns in customer datasets, directly informing marketing segmentation strategy.
- Built automated data preprocessing pipelines that reduced data preparation time by 35% and ensured reproducibility across modelling experiments.
- Created interactive dashboards in Tableau and Matplotlib to communicate model outputs to non-technical stakeholders, improving decision-making speed.
- Collaborated with data engineering to integrate ML pipelines into production infrastructure on AWS, enabling real-time scoring at scale.

Data Analyst Consultant | 10Alytics *Jan 2024 – Mar 2024*

- Conducted comprehensive data analysis using SQL, Python, Power BI, and Tableau, resulting in a 25% increase in actionable business insights delivered to client stakeholders.
- Designed and deployed interactive dashboards that improved data accessibility and reduced decision-making time by 30% across client teams.
- Communicated complex analytical findings to non-technical audiences through clear visualisations, increasing data-driven decision adoption by 40%.
- Implemented data validation and cleaning procedures that reduced data entry errors by 25% and improved overall data integrity across pipelines.

Data Analyst Intern | 10Alytics *Jun 2023 – Dec 2023*

- Applied regression analysis and hypothesis testing to uncover statistically significant correlations in operational datasets, contributing to a 15% improvement in forecasting accuracy.
- Designed and executed A/B tests for product feature enhancements, identifying a 10% lift in user engagement and providing statistically-validated optimisation recommendations.
- Built customer churn prediction models using scikit-learn, achieving a 15% reduction in churn rate and measurably improving retention.
- Implemented time-series forecasting models (ARIMA, Prophet) that improved inventory management, reducing excess stock by 20%.
- Identified key dataset trends and outliers, reducing operational inefficiencies by 20% and supporting a 12% reduction in departmental expenses.

CORE TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, Statsmodels), SQL, MySQL, SQL Server
ML / AI	Supervised & Unsupervised Learning, NLP, Customer Churn Prediction, Time-Series Forecasting, Feature Engineering, Model Deployment
BI & Viz	Tableau, Power BI, Looker, Google Data Studio, Matplotlib
Cloud & Big Data	AWS, Google BigQuery, Apache Spark, Docker
Other Tools	MS Excel, Salesforce, JupyterNB, Git
Soft Skills	Statistical Analysis, Problem Solving, Stakeholder Communication, Cross-functional Collaboration

KEY PROJECTS

Customer Churn Prediction Model | **Python · Scikit-learn · Tableau** *2024*

- Built an end-to-end churn prediction pipeline using Random Forest and XGBoost on a 50,000-record customer dataset, achieving 91% AUC-ROC; deployed as a REST API for real-time scoring.

NLP Sentiment Analysis Pipeline | **Python · NLTK · spaCy · Flask** *2024*

- Designed and deployed a multi-class sentiment classifier on product reviews using BERT fine-tuning, attaining 87% accuracy; results surfaced via an interactive Tableau dashboard.

Supply Chain Logistics EDA & Forecasting | **Python · Pandas · Scikit-learn** *2025*

- Performed full EDA and predictive modelling on 9,215 shipment records; Random Forest classifier achieved 98.3% accuracy in late-delivery prediction with transit time and unit volume as key drivers.

EDUCATION

MSc Data Science *Apr 2024 – Dec 2024*
10Alytics, United Kingdom

MSc Advanced Computing in Big Data *Jan 2021 – Nov 2023*
University of the West of Scotland · Dissertation: [Add your thesis title]

BSc (Hons) Computer Science *Jul 2009 – Sep 2014*
Olabisi Onabanjo University, Nigeria · GPA: 3.52 / 4.0
